

XML

Applied XML

- Communications
- Configuration
- Data Transformation
- Domain-Specific Grammars
- Publishing/Presentation

Related Standards

- XPATH
- Xpointer/Xlink
- XSLT/CSS

Software Development

- Adapters/Connectors
- Editors/Validators
- Parsers
- XSLT Processors

Structuring Data

- DTDs and Schemas
- Elements and Attributes
- Entities
- Namespaces
- Validity/Well-Formedness

General Knowledge

- Processing Stylesheets with XML
- Purpose and Use
- W3C Questions
- XSL FO
- XSLT
- XSLT and CSS

XSL Formatting

- Concepts
- Objects and Properties

- Using

XSL Software

- General Knowledge
- General Software
- XSL FO
- XSLT

The XML Standard

- Future Directions
- Markup Language Relationships
- W3C and Ownership

Web Presentation

- HTML Generation
- Presentation Media Support
- Stylesheets

Web Technologies

- Frameworks
- SOAP
- Web Services
- WSDL

XML Characteristics

- Business Purpose
- Internationalization
- Modularity
- Technology Selection
- XML and its Relationship with HTML

XSL Transformation

- Conditional Processing
- Expressions and Templates
- Namespaces
- Output
- Patterns and Xpath
- Properties and Methods

- Sorting and Queries
- Structure
- XSLT
