

## **SEED Infotech and Saama Tech to create resources in BI**

Pune-based SEED Infotech Ltd., a training, staffing and consulting company and Saama Technologies Inc., a consulting and systems integration firm have now struck a deal to create workforce for the Business Intelligence (BI) stream.

Saama brings in value added experience of various applications that are required in the industry today, on the basis of which along with SEED will design a course curriculum in BI. This alliance is a win-win situation for prospective professionals who aspire to migrate to BI or for fresh graduates who can undergo intensive training under the focused supervision of Saama. The alliance plans to focus not just on the Tools training but also on the end use application which is the need of the market today.
